

Caliber Processes

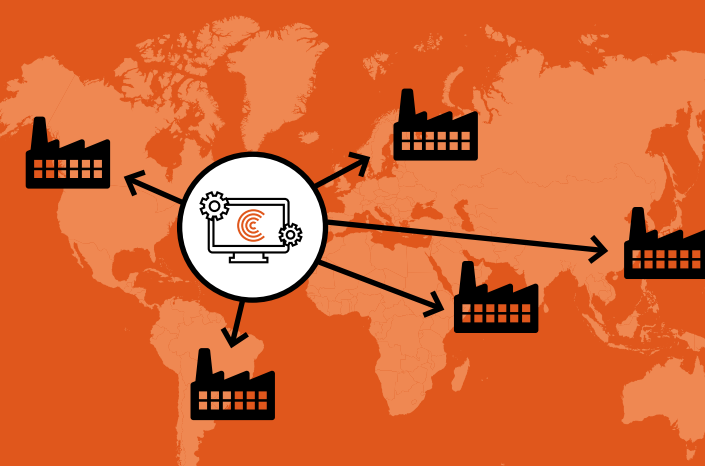

1 Global store expansion

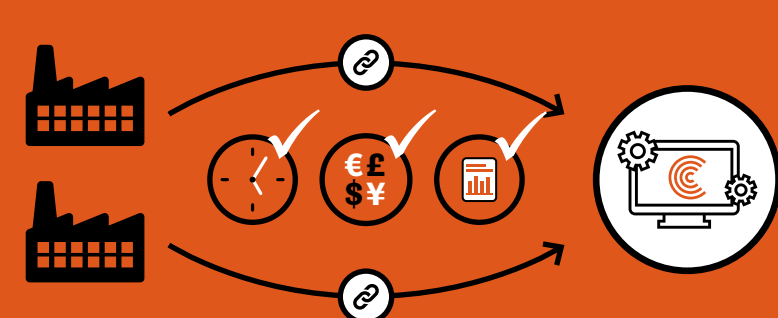

2 Strategic sourcing of fixtures, furniture and equipment (FF&E) by the Brand

3 Caliber places POs for FF&E – often on behalf of the Brand – with approved suppliers using the MyCaliber IT system

4 Supplier confirms all PO details (quantity, lead time, prices, etc.) directly in the MyCaliber system

5 Supplier completes 'Advanced Shipment Notification' (weight, dimensions, items per pallet, etc.) directly in the MyCaliber system. Supplier can print all international shipping documents and labels directly from the MyCaliber system.

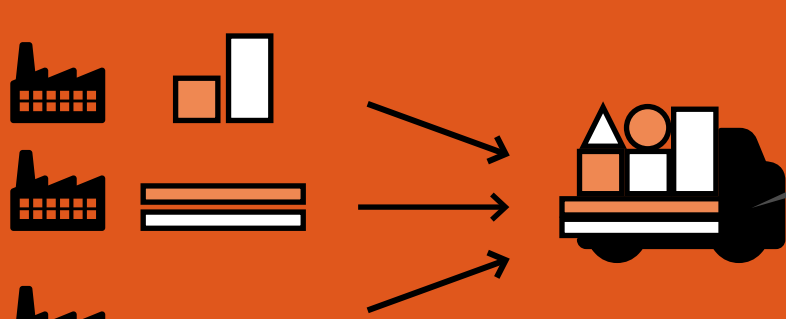

- Management-by-exception
- Increased capacity
- No demurrage

6 Caliber arranges the most suitable and lowest cost carrier. Carriers feed transportation milestones directly into MyCaliber

- Real time tracking on item level

7 Multiple shipments are consolidated into one shipment whenever possible

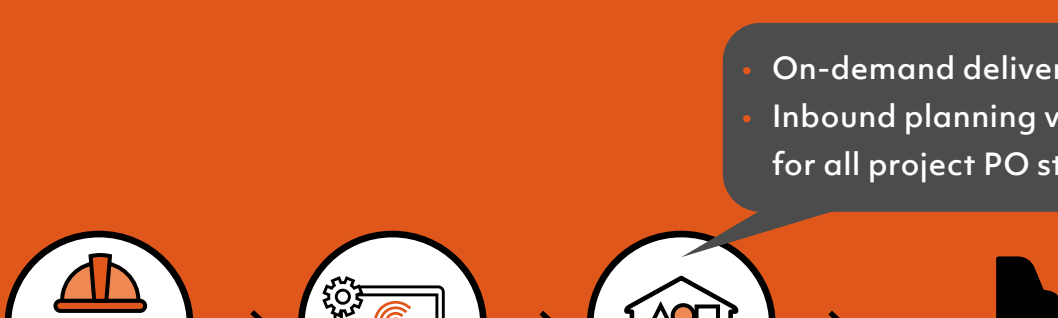

- Full truck loads
- CO₂ ↓
- \$ ↓

8 Materials are shipped direct to site or into a Caliber managed temporary warehouse location close to the project job site

- Full control
- End-to-end visibility

9 Final mile delivery; materials shipped from temporary warehouse to job-site at General Contractor's request

- On-demand delivery
- Inbound planning visible for all project PO statuses

10 Store opens on time (or even earlier than expected)

- Damages ↓
- Expediting ↓

- Total control
- No hassle!
